

THE NEW JEEP® CHEROKEE

BORN OF AUTHENTIC JEEP® BRAND DNA.

The all-new 2014 Jeep® Cherokee raises the bar with superior on-road ride, handling and fuel economy, best in-class 4x4 capability and top-notch technology. This is for those who require both form and substance. Perfectly sized to perform with sophisticated, efficient skill, the New Jeep® Cherokee goes far and wide with its legendary Jeep® brand DNA.

Engineered to excel on all terrain, designed to hit the mark in any situation, New Cherokee invites the adventurer in you to get out and experience the best of all worlds. From every point of view.

WILD IS THE BEAUTY.

The New Cherokee is designed for the future with a fresh and aggressive new exterior that honours its legendary heritage: its brand new shape looks amazing even to the most demanding eye. It has a powerful stance, an aggressive wheel-to-body proportion and a commanding road presence. Fluid, sleek exterior lines highlight the efficient, wind-splitting upper body of the New Cherokee. The rugged, protective lower body conveys the legendary capability that is a characteristic of every Jeep.

A first glance is enough to understand that the New Cherokee is a gritty and mighty vehicle on any terrain and in all weather conditions.

Model shown Cherokee Limited

MADE TO HIT THE MARK.

Every sculpted inch of the New Cherokee has been thoughtfully designed to be efficient and capable. Go explore it in the detail, starting from the traditional seven-slot grille that stays true to its Jeep_® brand roots, with daring, sleek daytime running lights adding the next generation of safety and design distinction. Notice also, the new CommandView[®] dual-pane sunroof that offers wide-open viewing, day or night. It includes a power sliding glass front panel and a fixed glass panel with power sunshade in the rear.

THE CHEROKEE SOUL HAS NEVER BEEN SO FIGHTING FIT.

The New Cherokee introduces a unique, fashionable style into the Jeep® range. Just take a look at all the details and you will also discover a premium, well-crafted interior with an extensive use of soft-touch materials: a sophisticated blend of hand-sculpted fluid shapes, high-quality materials, innovative colour and material choices, precision craftsmanship, state-of-the-art technology and features. A world of unique perfection waiting to be discovered. By you.

Model shown Cherokee Limited with optional Vesuvio interior

DISCOVER A WORLD-CLASS INTERIOR.

Discover its driver-oriented cockpit, loaded with easy-to-use, handy technology. Sit comfortably on its finest Nappa leather trim, power-adjustable, heated seats standard on the Limited version. The 60/40 split second-row seats adjust fore and aft for increased passenger comfort and cargo flexibility.

with Morocco Black interior

BEST-IN-CLASS 4X4 CAPABILITY.

The New Cherokee takes legendary 4x4 capability to the next level for those who desire the distinct advantages of an all-weather, all-terrain Jeep®. It's purposefully designed to adapt to your surroundings with in-born confidence, thanks to its legendary Jeep® brand DNA, arriving at destinations others only dream of reaching.

Choose from three new 4WD systems: the single-speed, fully automatic Jeep® Active Drive I, the two-speed PTU Jeep® Active Drive II that offers torque management and low range and Jeep® Active Drive Lock (standard on Trailhawk version) adding a locking rear differential. So you can greet the sun from your hilltop home, crawl over boulders with ease, travel the back roads to town, then head to the city streets for a special night out.

THE POWER TO TACKLE MOTHER NATURE'S TOUGHEST CONDITIONS.

The new, available Selec-Terrain® System allows you to choose the on and off-road setting for optimum performance to help you successfully navigate specific road conditions. Up to four customised settings are offered: Auto, Snow, Sport and Sand/Mud. The Trailhawk version adds the Rock setting to maximise off-road capability. Selec-Terrain electronically coordinates and optimises up to 12 systems on any terrain providing enhanced vehicle control including: drivetrain control module, electronic brake controller, electronic stability control (ESC), transmission controller and powertrain controller.

GO EVERYWHERE. DO ANYTHING.

The Jeep[®] Cherokee is the first mid-size SUV to feature rear-axle disconnect, resulting in reduced energy loss when 4x4 capability isn't needed – improving fuel efficiency. The rear-axle disconnect seamlessly switches between two and four-wheel drive for full-time torque management and does not require input from the driver. The New Cherokee can take on trails and traffic with equal aplomb, thanks to its refined, efficient 2.4L Tigershark MultiAir L4 petrol engine or its powerful new 3.2L Pentastar[®] V6 petrol engine.

2.4L TIGERSHARK

Efficiency and refinement are hallmarks of the 16-valve, 2.4l Tigershark MultiAir L4, fitted on the new Jeep Cherokee. The 2.4l engine features MultiAir technology and boasts the second-generation 'MultiAir2' system that further enhances combustion control, improves efficiency and reduces exhaust emissions. The 2.4l Tigershark MultiAir L4 produces 130 kW at 6 400 r/min and 229 Nm of torque at 3 900 r/min.

3.2L V6 PENTASTAR[®]

The new 3.2L Pentastar V6 engine is the first derivative of the celebrated 3.6L Pentastar V6. It offers a refined driving experience with reduced noise, vibration and harshness, and exceptional power output. The 3.2L Pentastar V6 engine, together with its new, class-exclusive 9-speed automatic transmission is available with the Jeep[®] Active Drive I or Jeep[®] Active Drive Lock 4x4 system.

HAVE A SMOOTH RIDE.

The New Cherokee is the first SUV in the segment to feature a 9-speed automatic transmission. It's all about driving, comfort and efficiency. Electronic Range Select supports a manual shifting capability that includes over 40 individual shift maps for specific conditions to help maximize efficiency, performance and drivability. Thus, performance is attuned to nearly any driving demand, both on and off-road, and gear shifts are almost imperceptible on every terrain.

A NEW SPECIES DESIGNED TO RISE ABOVE ALL OTHERS.

Introducing an exciting new species: the Jeep[®] Cherokee Trailhawk. It exemplifies Jeep[®] 4x4 capability with a distinctive, aggressive look for the most capable Jeep[®] Cherokee model and the most capable mid-size SUV in the segment. Thanks also to its new, standard 9-speed automatic transmission that performs with strong, smooth precision and is powered by the new 3.2L Pentastar[®] V6 engine. Numbers never lie: the Jeep[®] Cherokee Trailhawk boasts an approach angle of 29.9 degrees, a departure angle of 32.1 degrees and a breakover angle of 22.9 degrees. Running ground clearance is 22.1 cm. If you want performance, this one is for you!

The “Trail Rated” badge on the Jeep[®] Cherokee Trailhawk indicates that the vehicle is designed to perform in a variety of challenging off-road conditions identified by five key consumer-oriented performance categories: traction, ground clearance, manoeuvrability, articulation and water fording.

THE EXHILARATION OF A PERFECT PERFORMANCE.

The Trailhawk achieves, aggressive approach and departure angles, complements of the unique front and rear fascias, increased ground clearance, skid plates and Jeep® Active Drive Lock with locking rear differential for maximum off-road performance. The locking rear differential is selectable in any low range terrain mode, but will lock automatically when in certain modes, such as "Rock," to maximise tractive effort at the tyre patch that supports it.

The Selec-Speed® of the Trailhawk takes legendary 4x4 capability to the next level: it can safely manage travel over steep inclines or declines by automatically adjusting the throttle for vehicle-controlled forward movement.

Its top performances also include an absolute comfort: seats are ergonomically designed to support the contours of the body, are trimmed with premium cloth or quality Nappa leather and available as power adjustable, heated seats with memory.

DRIVING TOMORROW'S TECHNOLOGY TODAY.

This is a cabin that allows you to command the road ahead from a very comfortable and informed vantage point. Cherokee's advanced technology delivers data that can keep you on track, handing you the freedom to head out with confidence. With the UConnect® system, you're always connected, informed, entertained, and more productive. You can connect your compatible media device, play CDs, or display your photos on your UConnect® screen via the USB port, SD media card, or auxiliary port. Standard on Limited and Trailhawk a conveniently positioned 8.4" touch screen, offers a range of standard and available entertainment features and services, including voice command of navigation, hands-free phone calls, and climate control. This is how you advance your world, in a world that's very advanced.

TECHNOLOGY CAN BE SO ATTRACTIVE.

The 7" TFT reconfigurable instrument cluster allows drivers to enjoy a customised user experience and receive information and vehicle feedback in the format they prefer while keeping their hands on the wheel and their eyes on the road.

The available Parallel/Perpendicular Park Assist System is displayed in the centre of the gauge cluster and operated with buttons on the steering wheel and the shifter. The graphic walks the driver through the steps necessary to utilise the park assist system.

The driver can select from a multitude of information that can be displayed in the centre of the gauge cluster including turn-by-turn navigation, speed, real-time fuel economy, safety warnings, available Adaptive Cruise Control, audio information and Jeep-specific features including Selec-Terrain.

PAMPERED BY TECHNOLOGY.

On-board comfort will exceed your expectations by offering intelligent and highly advanced technology systems.

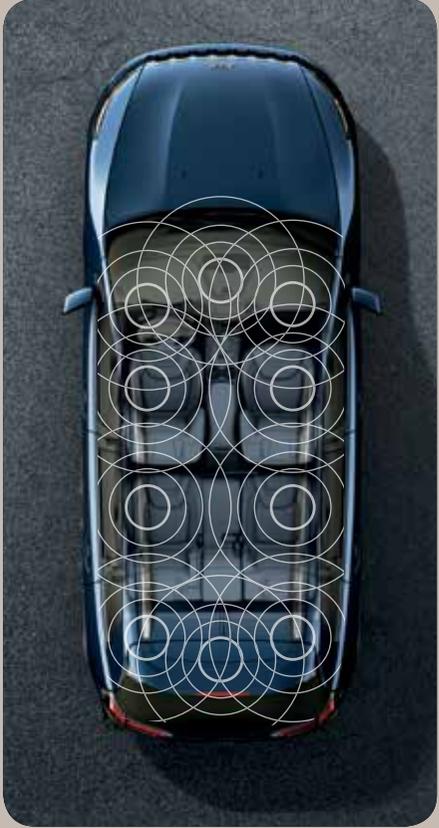

WIRELESS CHARGING PAD

An available wireless charging pad is concealed in the upper tray of the centre storage. It enables wireless charging of any cellphone that is Qi wireless charging capable. An integrated phone docking station and USB, SD, auxiliary and power port outlets give Cherokee the leading edge on technology.

ALPINE PREMIUM AUDIO SYSTEM

Cherokee features a premium 9-speaker sound system with an 8" subwoofer and 506 watts of power, designed in tandem with Alpine®.

////ALPINE.

Model shown Cherokee Limited

PEACE-OF-MIND SAFETY & SECURITY.

Cherokee has 70 standard and available safety and security features and was awarded the prestigious Euro NCAP five-star rating. The new Jeep® steering wheel puts a wide range of controls safely at your fingertips. With a strong foundation forged from 65 percent high-strength steel, engineers have added a full range of active and passive available features to deliver peace-of-mind wherever you go. Class leading options include Adaptive Cruise Control Plus, ParkSense Parallel and Perpendicular Park Assist and Lane Departure Warning Plus.

Mod

AN ADVANCED SYSTEM OF SAFETY.

PARKSENSE PARALLEL AND PERPENDICULAR PARK ASSIST.

This active guidance system automatically controls steering by using ultrasonic sensors that help you ease into parking spots.

ELECTRONIC STABILITY CONTROL (ESC).

A network of safety sensors throughout the vehicle helps maintain vehicle control, providing instant aid should they detect you're veering off your intended path. ESC coordinates Electronic Roll Mitigation (ERM), Anti-lock Brake System (ABS) and Brake Assist, All-Speed Traction Control and available Trailer Sway Control (TSC), prompting them into action when needed.

ELECTRONIC ROLL MITIGATION (ERM).

As an extension of ESC, ERM employs ESC sensors to anticipate potential risk situations. If things get rough, ERM takes immediate action to help you maintain stability and remain under control.

LANESENSE™ LANE DEPARTURE WARNING (LDW).

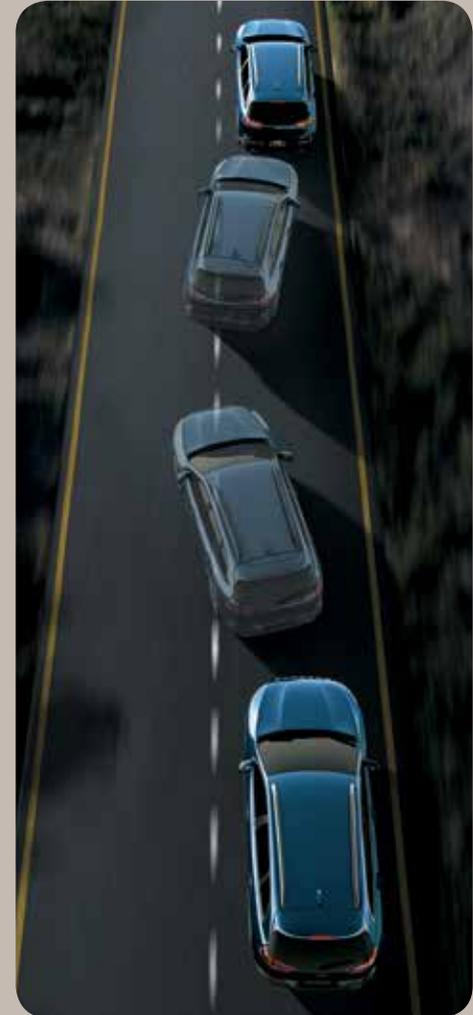

The vehicle lane position is monitored by cameras and, should the driver drift outside of lane boundaries or if the driver's hands are off the wheel, the system provides a visual and audible warning.

BLIND SPOT MONITORING AND REAR CROSS-PATH DETECTION.

These sentry systems constantly monitor the space between you and other drivers. When a side or rear blind spot is encroached, you're notified via illuminated icons on sideview mirrors or by an audible chime.

7 STANDARD AIRBAGS.

Full-length side-curtain driver inflatable knee-bolster airbag, seat-mounted for front occupants side thorax and advanced multi-stage front airbags all work in tandem to help provide protection.

ADAPTIVE CRUISE CONTROL WITH STOP & GO.

Take the guesswork out of keeping a safe distance from the car ahead while cruising on the highway. The system automatically adjusts cruising speed to maintain a preset distance between you and the vehicle in front of you and can bring Cherokee to a complete stop without driver intervention to help avoid a collision.

FORWARD COLLISION WARNING WITH CRASH MITIGATION.

Radar sensors detect when Cherokee may be approaching another vehicle too rapidly and send an audible and visual alert to the driver along with providing 1.5 seconds of brake assistance if the driver does not react in time.

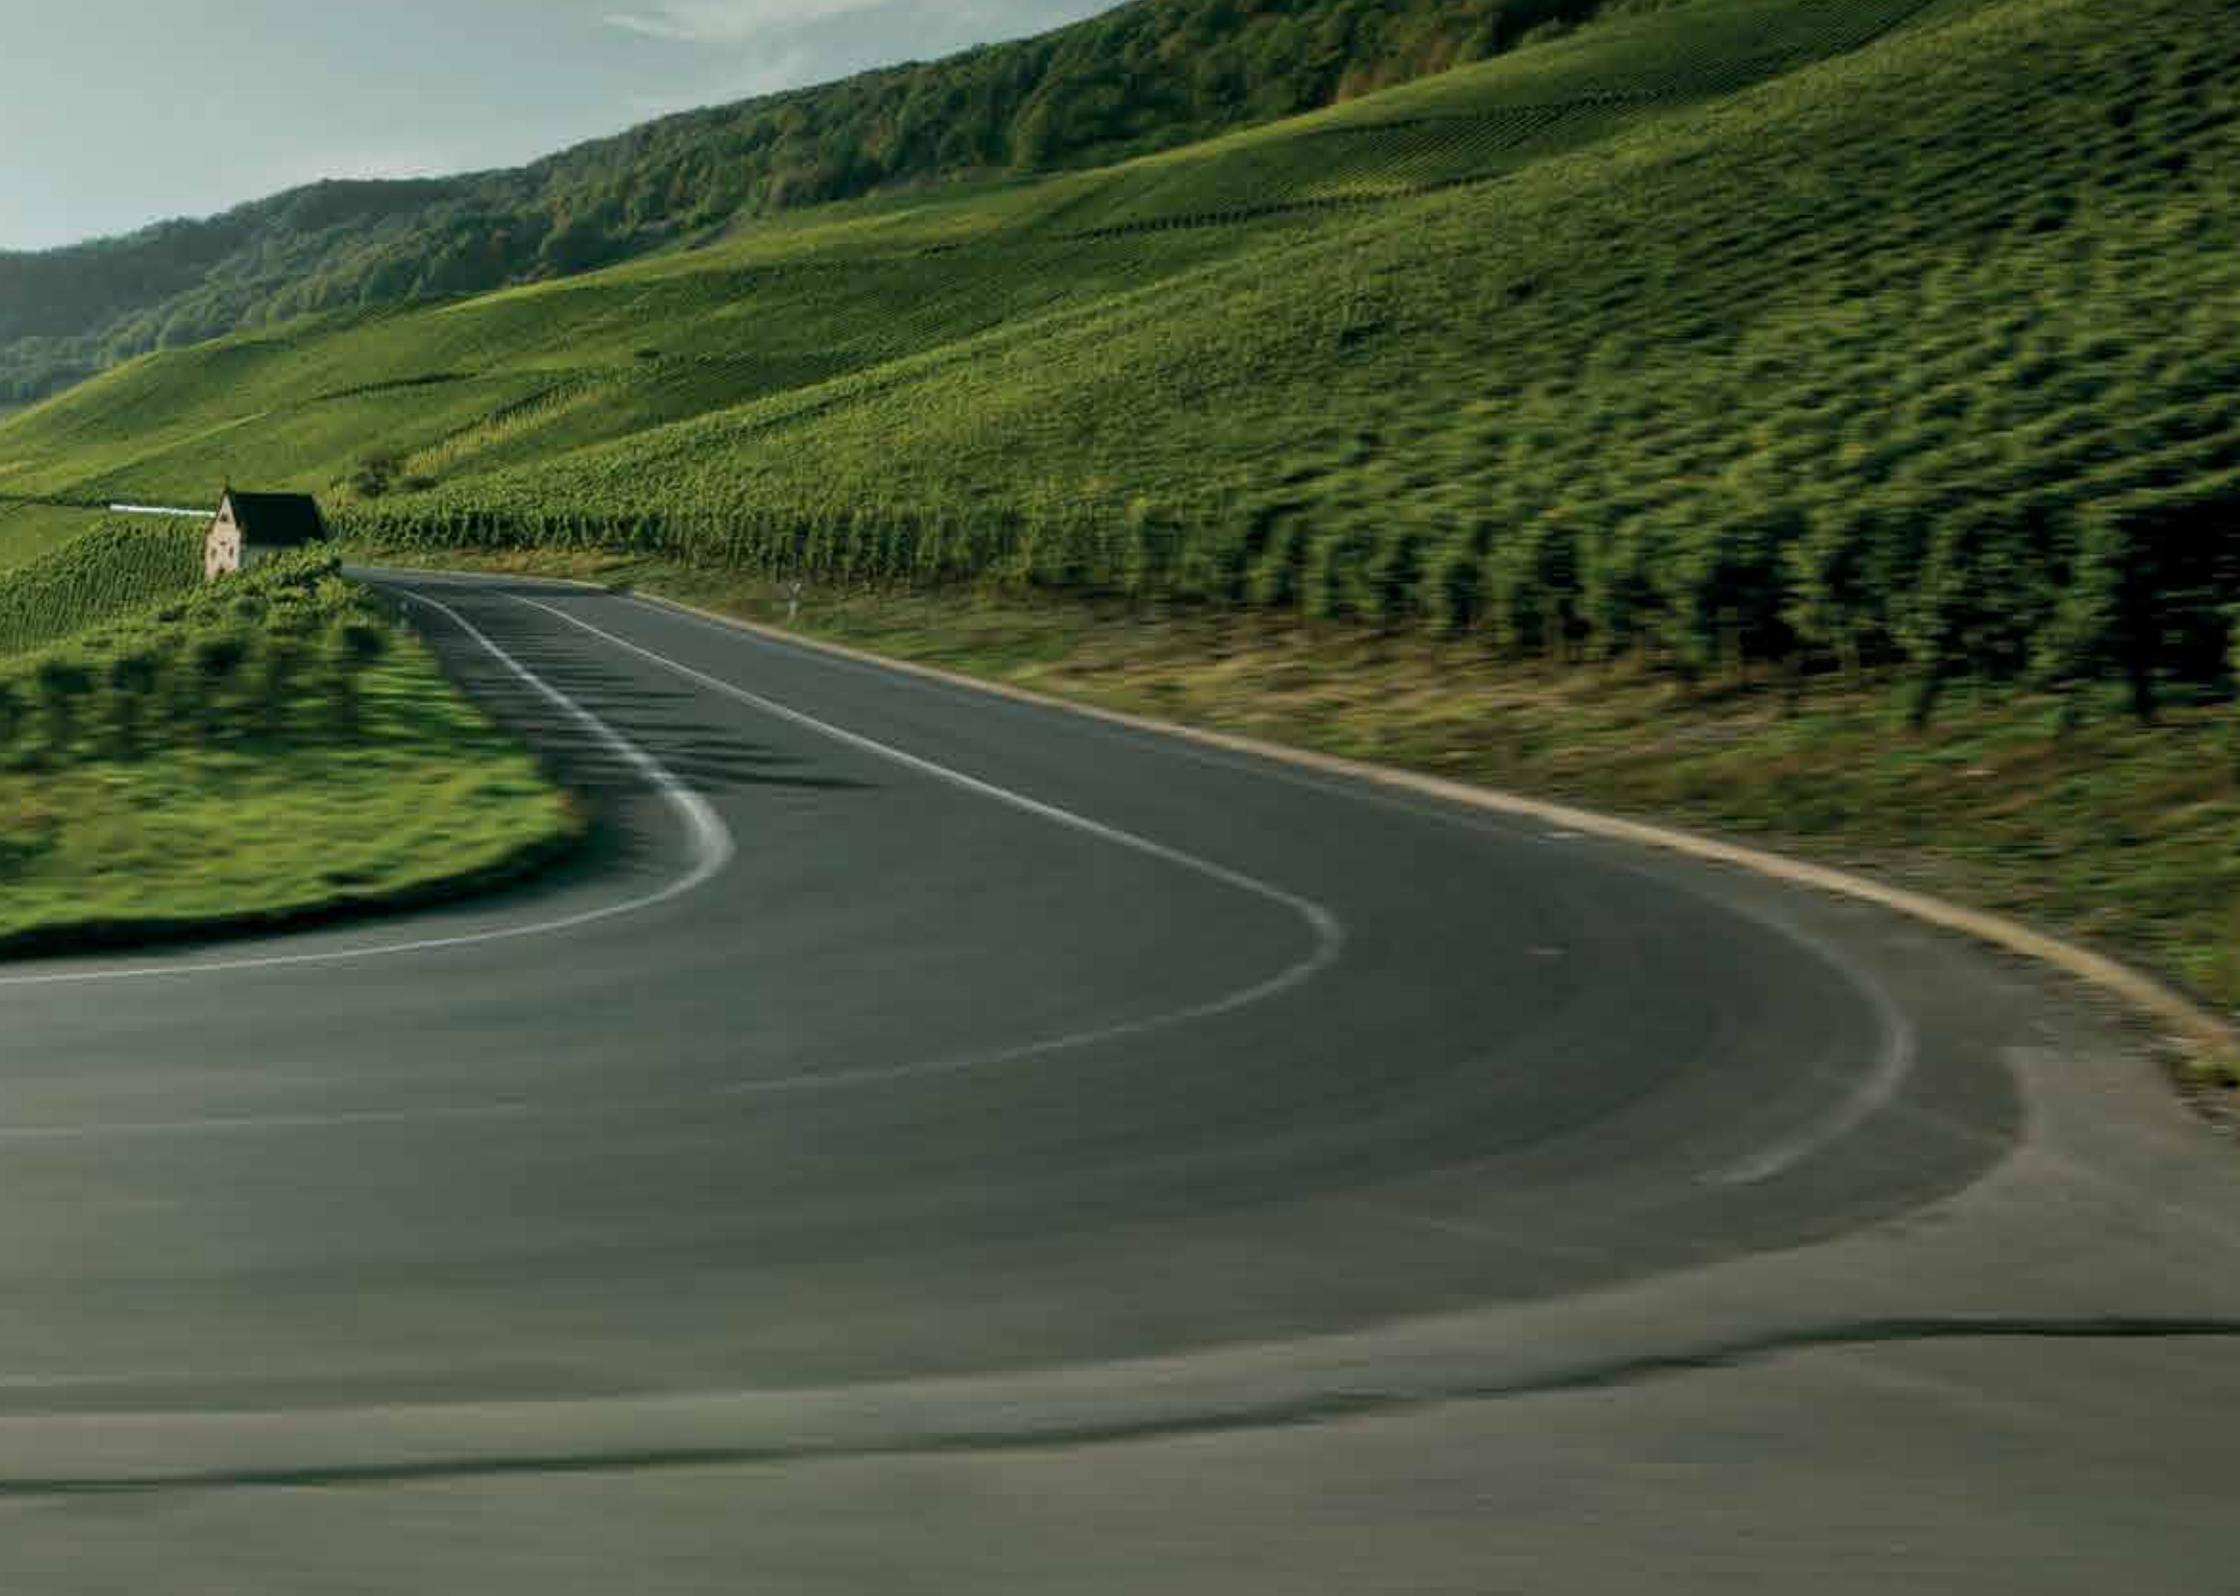

RAIN BRAKE SUPPORT.

This system automatically helps maintain optimal braking by keeping brake rotors dry in rainy conditions, with assistance from the Electronic Stability Control (ESC).

TRAILER SWAY CONTROL (TSC).

Crosswinds and traffic hold no sway over you and your payload. As part of ESC, TSC helps keep you and the toys you are towing safely on course.

Model shown Cherokee Limited

CUSTOMISE YOUR FREEDOM.

Cherokee is ready to express yourself and your lifestyle. It's up to you to choose among a rich line of accessories for personalising your car.

STAY TRUE TO YOURSELF.

Whether you're climbing rugged hills or cruising smooth highways, raise the profile and capability of your Cherokee with Authentic Jeep Accessories from Mopar®. You can count on these quality-engineered parts and accessories to keep your Cherokee as authentic as the day you bought it. For a true, seamless fit and finish, exact colour matches and high-quality material, it's smart to choose Mopar for the life of your ride. New and exciting Mopar accessories for Jeep Cherokee are always being developed, including the new Cargo Management System accessories, rack and carriers, alloy wheels and more.

Jeep®

In addition, your ownership experience is supported by the Mopar Vehicle Protection extended warranty and maintenance packs. The most complete protection for your vehicle beyond the factory warranty, offering comprehensive coverage for all mechanical and electrical components with a time and mileage option to suit your driving habits.

Mopar Vehicle Protection is factory-backed and ensures that all work is performed by factory-trained technicians using genuine parts at authorised repair facilities.

	Multiport fuel injection	3.2-litre — 3.517
		Sequential multiport electronic, returnless

BODY/SUSPENSION

BODY DESIGN

Unibody structure based on Chrysler and Fiat's common underbody architecture strategy. All-steel frame structural members welded and bonded into a single unit. Constructed of approximately 65-percent advanced, hot-stamped high-strength steels, the body structure on the Cherokee is as solid and rigid as any in its competitive set and enables precise tuning and dynamic control.

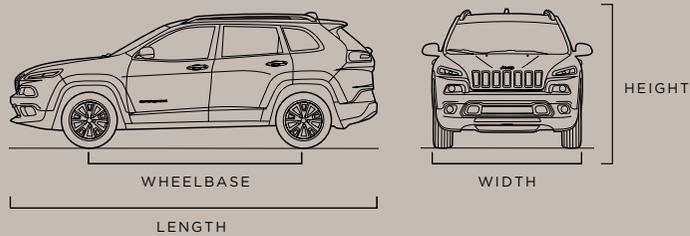

SUSPENSION

Front: MacPherson strut, one-piece aluminum subframe, aluminum lower control arms and knuckles, high-strength steel coil springs and stabilizer bar.

Rear: Multilink rear suspension, aluminum lateral links, isolated high-strength steel rear cradle, coil springs and stabilizer bar.

STEERING

Electric power rack and pinion
 Ratio: 15.15 4x2 and 4x4, 15.36 4x4 Lock
 Turns (lock-to-lock):
 2.56 4x2 and 4x4, 2.67 4x4 Lock
 Turning Diameter (kerb-to-kerb):
 4x2 - 11m, 4x4 - 11.6m, 4x4 lock - 12m
