

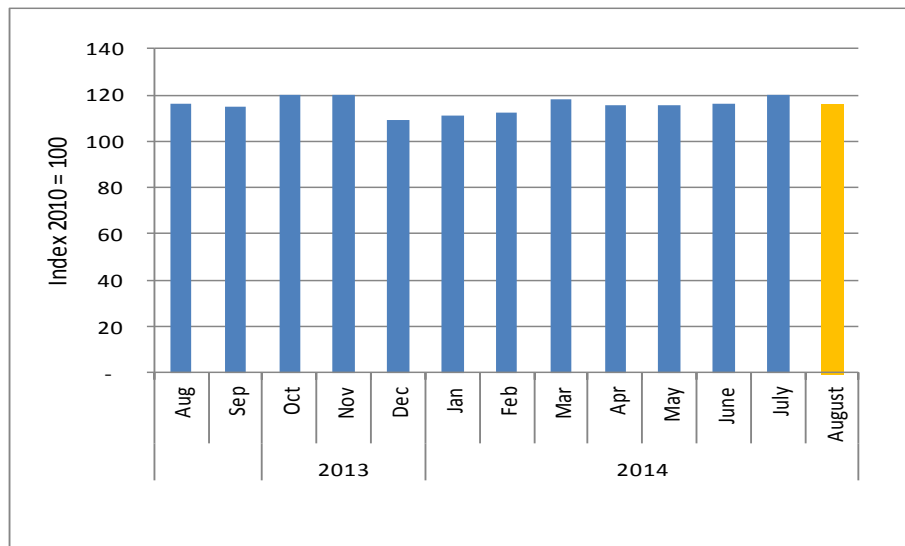

### Chart 1: Electricity Total Sales Index (2010 = 100)

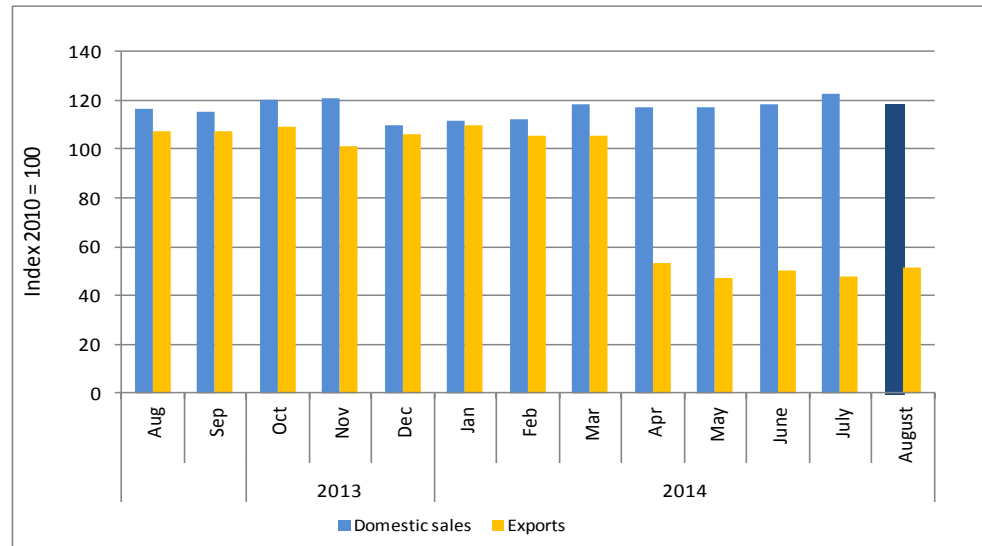

The electricity sales composite index (ESCI), consisting of domestic and export sales of electricity, has remained largely unchanged over the past year, fluctuating between the index level of 100 and 120.

The composite index of electricity sales index for August 2014 stood at 116 points. This represents a decrease of 4 basis point m/m; while y/y the index is up by 0.6 basis points, translating to a 3.2 per cent decline and 0.5 per cent increase, respectively.

*The electricity sales took a deep in the month of August 2014 which was mainly influenced by the domestic sales that declined by 3.3 per cent when compared to the previous month of July 2014.*

During the period under review, total sales of 260 495 mega-watt hours were recorded, an increase of 0.5 per cent y/y and a decline of 3.2 per cent m/m comparison.

### Chart 2: Electricity Sales Sub-Sectors Index (2010 = 100)

Sales to distributors and mining continues to be the major driver of the domestic electricity sales, recording 190 476 mega-watt hours and 51 597 mega-watt hours in volume terms, respectively.

The domestic sales index stood at 119 basis points in August 2014, increasing by a 2.0 per cent y/y; and a decrease of 3.3 per cent m/m. In August 2014 domestic sales recorded 257 140 mega-watt hours, a 3.3 per cent decline m/m and up by 2.0 per y/y.

The electricity export continues its trend of hovering below the index of 60 from May 2014 to August 2014. The index is slightly below the previous month by 3 basis points recording an index of 51, this translates into a huge decline of 52.1 per cent y/y. In volume terms the export sales stood at 3,391 mega-watt hours in August 2014.

### Methodological note

The information provided is on domestic electricity sales and exports and the sources of data is Nampower.  
The reference period for the index is 2010, and as for the overall index, weights are used in calculation.
