

# CP92 Door with Vision Panel

The CP 92 door provides secure access control within high risk environments which need to ensure extra protection against physical attacks. It protects staff and also discourages robbery attempts and other types of crimes involving the use of a firearm up to and including a 357 Magnum.

## Key Features

- A Masonite finish is provided which enables it to be painted in any colour when on site to fit into individual environment.
- The door is SABs certified ballistic tested to weapons up to and including a 357 Magnum firearm.
- The door is available with or without a vision panel. The vision panel fitted on the Eco CP92 Door consists of a clear vision glass which has the same attack resistance as the door.
- Various sizes are available including single as well as double leaf. The door comes pre-fitted in a ballistic tested frame. The frame is pre-drilled for fast, hassle-free installation in a fully finished wall opening.
- One Jaguar key lock, a 5 lever mortice deadlock for wooden doors which require an exceptional degree of protection. It is tested and certified to BS3621 for Thief Resistant Locks.

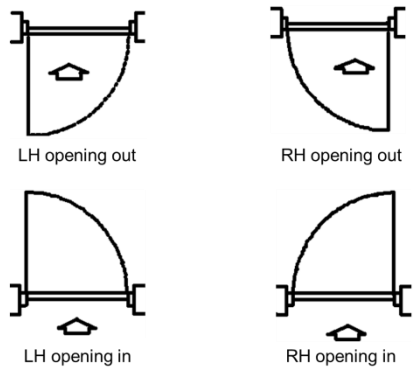

## Technical Information

Model	Lock	Wall Opening mm		Clearance 180° mm		Vision Panel Opening mm		Weight	Hinges	Finish

Right Hand (RH)	Opening In	Hinges are on the right hand side and not visible and the door opens away from you.

## Lock Options

Our comprehensive lock range includes the latest industry locks which offer a wide range of features. So whether it be the “mechanical combination” lock or a more hi-tech electronic solution, Gunnebo are sure to have a lock which will meet your security needs.

### Definitions :

- **Key Lock:** A manual key operated lock.
- **Mechanical Combination:** A mechanical keyless dial lock with a changeable combination.
- **Electronic Lock:** An electronically operated keypad lock with a changeable combination.
- **Manager Mode:** Allows one user to control the functions of other combination holders.
- **Number of Users:** The number of users able to program in their own access code.
- **Duress Feature:** It is possible for an alarm engineer to link the lock into a monitored alarm system. It is then possible, by a given procedure, to operate the lock, open the safe and silently signal to the monitoring station that this is being done under duress.
- **Time Delay:** This feature allows for a pre-set delay between operating the lock and being able to open the safe. The operation may vary between lock types.
- **Time Lock:** Time lock allows the user to set periods during which the lock may be operated, e.g. during business hours only. The options available will vary between locks.
- **Dual Control:** Allows two users to enter their details before any operation can be performed.

## Planning, Delivery & Installation

Once you have selected your door, Gunnebo can offer you a comprehensive installation survey (for certain products only). Gunnebo will then agree with you a flexible installation schedule. The flexibility of the installation process is evidence of Gunnebo’s commitment towards ensuring the cost and time efficient completion of your purchase.

Gunnebo products are delivered and installed by trained Gunnebo installers. Whatever the delivery environment (e.g. large bank or small office), you can be assured that the installers will take the greatest care. We are also focused on making sure the service on offer is achievable, to the highest standards of workmanship and is promptly completed within the contracted timescales.
