Minimum Lump Sum	N\$ 100,000
Initial Fee	None
Annual Management Fee	0.60% nacm
Nature of Distributions	Interest
Income Declaration	Accrued Daily, Paid Monthly

Who Should Invest?

The Pointbreak Money Market Fund is suitable for investors seeking a low risk investment that maximises income. It offers a high income yield, capital stability and good liquidity.

Investment Objective

The fund's objective is to achieve an investment return in excess of general money market instruments and funds while ensuring a high degree of liquidity, capital preservation and below average risk. To achieve this objective, the management company will invest in a Namibian unit trust or a South African collective investment scheme portfolio with an objective similar to that of the Pointbreak Money Market Fund, and which portfolio will be limited to invest in money market instruments, bank call and fixed deposits, fixed income securities, debenture stock, debenture bonds and unsecured notes, all to be acquired at fair market prices.

Fund Commentary

Inflation slowed further, coming in at 3.50% for February (down from 3.60% in January) in Namibia and at 4.00% for February (down from 4.40% in January) in South Africa - well within the inflation target band.

Lower headline and core inflation, a stronger Rand and avoidance of further ratings downgrade by Moody's, were well received by the SARB, which loosened the monetary policy, cutting the Repo Rate by 25bpts, to stimulate growth. We expect the BON to follow the SARB rate cut in their April meeting. The major risks remain stronger than expected US inflation, followed by aggressive Fed hikes, firming the greenback.

The fund's duration remains positioned on the longer side with the ability to invest into higher yielding instruments, should we see the spread in local rates widen.

Asset Allocation

Weighted Average Duration - 157 days
 Weighted Average Legal Maturity - 157 days

Collective Investment Schemes in Securities (unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit Trust prices are calculated on a net asset value basis, which is the total capital value invested including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Income accruals are made daily and paid out monthly. Purchase and repurchase requests may be received by the manager by 10h00 each business day. Permissible deductions may include management fees, brokerage, NAMFISA levies, auditor's fees, bank charges, trustee fees and RSC levies. A schedule of fees and charges is available on request from Pointbreak Unit Trust Management Company. Commission and incentives may be paid and if so, would be included in the overall costs.
