Who Should Invest?

The Pointbreak Money Market Fund is suitable for investors seeking a low risk investment that maximises income. It offers a high income yield, capital stability and good liquidity.

Investment Objective

The fund seeks to achieve an investment medium for unit holders which has as its primary objective to provide superior money market returns and current income as is consistent with liquidity and capital preservation. The fund feeds into the Pointbreak Cash Investment Fund, which invests with the four major banking groups in Namibia and other similar rated institutions in South Africa. Securities to be included in the portfolio consist of money market instruments, participatory interests in unit trust schemes, bank call and fixed deposits, fixed income securities embracing approved securities, government bills and bonds, quality commercial paper and repurchase agreements.

Fund Commentary

Inflation slowed further, coming in at 3.50% for February (down from 3.60% in January) in Namibia and at 4.00% for February (down from 4.40% in January) in South Africa - well within the inflation target band.

Lower headline and core inflation, a stronger Rand and avoidance of further ratings downgrade by Moody's, were well received by the SARB, which loosened the monetary policy, cutting the Repo Rate by 25bpts, to stimulate growth. We expect the BON to follow the SARB rate cut in their April meeting. The major risks remain stronger than expected US inflation, followed by aggressive Fed hikes, firming the greenback.

The fund's duration remains positioned on the longer side with the ability to invest into higher yielding instruments, should we see the spread in local rates widen.

Weighted Average Duration - 157 days

Weighted Average Legal Maturity - 157days

Collective Investment Schemes in Securities (unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit Trust prices are calculated on a net asset value basis, which is the total capital value invested including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Income accruals are made daily and paid out monthly. Purchase and repurchase requests may be received by the manager by 10h00 each business day. Permissible deductions may include management fees, brokerage, NAMFISA levies, auditor's fees, bank charges, trustee fees and RSC levies. A schedule of fees and charges is available on request from Pointbreak Unit Trust Management Company. Commission and incentives may be paid and if so, would be included in the overall
