TERMS OF REFERENCES (TORs)

1. Introduction

The Agricultural Bank of Namibia advances loans to farmers at a cost for agricultural use or other related purposes. The Bank has an internal structure responsible for collections on all advanced loans as they become due and payable. Clients have three methods of affecting their payments, i.e. stop orders, EFT and cash over the counter at branches or commercial banks. The Bank has recently introduced frequent payments on both existing and new clients and need to introduce a better payment system that put the Bank in charge of the payment demand to ensure timely payment of instalments.

The debit order system was identified as a better method of payment for the Bank above the existing stop order system in place.

The management of these debit orders requires service providers with advanced systems to provide performance reports at the click of the button. The debit orders need to be monitored to track their performance on a daily, weekly and monthly basis on real-time basis.

- Dashboard daily, weekly and monthly real time reporting on:

 - Collection Ratio for the period;

2.2 Service provider shall provide Agribank access to software which will enable it to capture and deliver payment instructions;

- 2.3** Service provider shall receive from Agribank captured payment instructions for onward transmission to the commercial banks;
