Income Declaration	Accrued Daily, Paid Monthly

### Who Should Invest?

The Pointbreak Institutional Money Fund is suitable for investors seeking a low risk investment that maximises income. It offers a high income yield, capital stability and good liquidity.

### Investment Objective

The fund's objective is to achieve an investment return in excess of general money market instruments and funds, while ensuring a high degree of liquidity, capital preservation and below average risk. The fund invests with the four major banking groups in Namibia, the five major banking groups in South Africa, Nampost Namibia and the Namibian, and South African Reserve Bank. Securities to be included in the portfolio consist of money market instruments, participatory interests in unit trust schemes, bank call and fixed deposits, fixed income securities, government bills and bonds, quality commercial paper and repurchase agreements.

### Fund Commentary

CPI inflation readings keep surprising on the downside, coming at 3.3% in Namibia and 4.1% in South Africa for September, on the back of a slower increase in housing and transportation costs.

The South African Medium-Term Budget Policy Statement projected further deterioration in government's debt to GDP ratio and fiscal deficit, making a Moody's revision to negative outlook a certainty. This caused an immediate sell-off in SA bonds with long-bond yields spiking by 35+bpts and the Rand losing approximately 3% against the majors.

South African money market rates followed the bond rates up, currently presenting an attractive yield, and diversification opportunity for the fund, compared to the Namibian money market curve which remains flat, suppressed by excess commercial bank liquidity.

### Asset Allocation

Weighted Average Duration - 166 days  
 Weighted Average Legal Maturity - 166 days

Collective Investment Schemes in Securities (unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit Trust prices are calculated on a net asset value basis, which is the total capital value invested including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Income accruals are made daily and paid out monthly. Purchase and repurchase requests may be received by the manager by 10h00 each business day. Permissible deductions may include management fees, brokerage, NAMFISA levies, auditor's fees, bank charges, trustee fees and RSC levies. A schedule of fees and charges is available on request from Ashburton Unit Trust Management Company. Commission and incentives may be paid and if so, would be included in the overall costs.
