

## Topaz and Topaz Plus HIV Medicine Formulary

### **GUIDELINES ON THE DISPENSING OF HAART (HIV MEDICINE) MEDICINE FOR TOPAZ AND TOPAZ PLUS MEMBERS**

1. Topaz and Topaz Plus options are primary care options. These two options were developed to provide basic primary health care to the employed who cannot afford the standard options.
2. Only the most affordable and available generics are covered as per the Methealth MNMP list, and restricted to the listed products.
3. There is no member co-payment on medicine for Topaz and Topaz Plus options. Please ensure that you dispense the most affordable and available generic medicine and according to the MNMP Price.
4. For the generic reference price of the listed products, please refer to [www.methealth.com.na](http://www.methealth.com.na) for the complete Methealth MNMP list
5. HAART is covered according to the National Guidelines. Triple combinations such as **TEEVIR** and **AVONZA** are particularly encouraged.
6. The options for patients who failed treatment on the first line and have to move to the second line of treatment, are to either access treatment through the state or upgrade to higher option.
7. HAART medications and other supportive treatment require pre-authorisation. Without pre-authorisation, claims will be rejected.
8. In the event of Post Exposure Prophylaxis, only in cases of rape will be covered.
9. Milk for Prevention of Mother-to-Child Transmission (PMTCT) will not be covered.
10. Pre-Exposure Prophylaxis (PrEP) will not be covered.
