

Debmarine Namibia Bridging the Gap

Bridging the Gap is a Namibian sponsorship initiative. The launch of this programme took place at the Hage Geingob stadium in Windhoek on 17 July 2019.

Bridging the Gap is Debmarine Namibia's brainchild and aims to target boys and girls of school-going ages across 14 regions in Namibia. The focus is solely aimed in the sports codes of U15 football and U17 netball.

Debmarine Namibia believes in the power of uplifting the Namibian youth through sports development. The initiative not only promotes economic development and a healthy lifestyle but also acts as a catalyst for social cohesion amongst our youth. We work to give children the opportunity to play the sports they love whilst developing astute young professionals, much needed for the industry.

Bridging the Gap continuously commits to support and uplift the betterment of the Namibian youth. Debmarine Namibia aims to raise awareness of careers within marine diamond recovery, as well as bursaries, scholarships and training opportunities.

Bridging the Gap creates a sustainable, effective environment for school-going aged boys and girls and to nurture the children's learning. For many years we have ensured vulnerable children in Namibia get the right infrastructure, training, education and support in order to obtain the most from their time and go on to lead productive, healthy and happy lives.

Health is a human right. All kids deserve to be healthy, active, and ready to learn and Bridging the Gap is proud to create healthier experiences to help them thrive.
