Inception Date	3 July 2007
Fund Manager	Ralf Düvel
Benchmark	Namibia Bank Rate minus 0.5%
Risk Profile	Low
Price	100.00 cents
Fund Size	N\$ 5,262,398,951
Minimum Lump Sum	N\$ 100,000
Initial Fee	None
Annual Management Fee	0.60%
Total Expense Ratio (TER)	0.66%
Nature of Distributions	Dividends
Income Declaration	Accrued Daily, Paid Monthly

Who Should Invest?

The Pointbreak Money Market Fund is suitable for investors seeking a low risk investment that maximises income. It offers a high income yield, capital stability and good liquidity.

Investment Objective

The fund's objective is to achieve an investment return in excess of general money market instruments and funds, while ensuring a high degree of liquidity, capital preservation and below average risk. The fund invests with the four major banking groups in Namibia, the five major banking groups in South Africa, Nampost Namibia and the Namibian, and South African Reserve Bank. Securities to be included in the portfolio consist of money market instruments, participatory interests in unit trust schemes, bank call and fixed deposits, fixed income securities, government bills and bonds, quality commercial paper and repurchase agreements.

Collective Investment Schemes in Securities (Unit Trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit Trust prices are calculated on a net asset value basis, which is the total capital value invested including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Income accruals are made daily and paid out monthly. Purchase and repurchase requests may be received by the manager by 10h00 each business day. Permissible deductions may include management fees, brokerage, NAMFISA levies, auditor's fees, bank charges, trustee fees and RSC levies. A schedule of fees and charges is available on request from Ashburton Unit Trust Management Company. Commission and incentives may be paid and if so, would be included in the overall costs.

Fund Commentary

CPI inflation readings keep surprising on the downside, coming in at 2.5% in Namibia and 3.6% in South Africa for November, on the back of further slowing of housing, food and transportation costs.

The Namibian excess commercial bank liquidity position has declined over the last two months of the year, leading to lower participation in recent Treasury-Bill auctions. This resulted in the sovereign-, and commercial bank money market curve shifting up, to spreads of 20bpts on the long end.

We expect the money market curve to remain flat for the first quarter of the year, with a slight steepening bias, that could be driven by lower commercial bank liquidity and fiscal demand.
