

Cambridge Exam Science Practical Workshops at the DHPS

Workshop Overview

The DHPS offers hands-on practical workshops for science subjects twice annually, before each exam period. These sessions are designed to help students develop essential skills and are scheduled over several Fridays or Saturdays in the weeks leading up to the exams, depending on demand. Participation is optional, and workshop fees are paid directly to the subject teacher, separate from exam fees.

Priority for the March/April workshops will be given to students preparing for the June exams, while those preparing for the October/November exams will be prioritised for the August/September workshops. If space allows, additional students may be accommodated.

For further details about the workshops, please reach out to Ms. Pieterse at x.pieterse@dhps-windhoek.com.

We look forward to supporting you in your exam preparation.

Warm regards,
Cambridge Department
